CONTENTS

19 ***Hatfield Memorial Lecture*** **The new world of steel** J. Edington

29 ***Historical metallurgy*** **Brown Bayley Steels Ltd** C. Bodsworth

---

2nd Annual Seminar of the EPSRC Engineering Doctorate Centre – Wales

33 **Editorial**

34 **Modelling of hot strip mill runout table using artificial neural networks** D. Loney, I. Roberts, and J. Watson

40 **Supermeniscus interactions between molten zinc and bath hardware materials in galvanising** M. S. Brunnock, R. D. Jones, G. A. Jenkins, and D. T. Llewellyn

47 **Design of steady state apparatus to evaluate heat transfer coefficient of spray** J. Fry, H. D. Morgan, W. D. Morris, and J. O. Medwell

53 **Investigation of effects of substrate texture and film build on appearance of painted automotive steel** T. L. Wong, R. D. Jones, and T. Mayes

60 **Spectral signatures of sticker wrench faults in temper rolling of batch annealed steel strip** C. Stuckey, J. A. Brandon, and J. Moore

64 **Technoeconomic evaluation of autobody materials** S. C. H. George, M. Evans, and K. Lowe

72 **Use of ultrasound in strip steel pickling process** B. J. Goode, R. D. Jones, M. Evans, and J. N. H. Howells

79 **Relative influence of sheet rolling direction and weld orientation on formability of laser welded sheet** P. J. Scriven, J. A. Brandon, and N. T. Williams

84 **Domain refinement techniques for improved magnetic properties of high permeability grain oriented electrical steels** J. A. Homewood, D. Snell, and A. J. Moses

90 **Investigation into the effect of agitation on morphology of tin deposits** A. Longley, K. Williams, and T. Thomas

95 **Statistical analysis of surface texture transfer from work roll to steel strip** D. L. Owen, H. P. Evans, and T. E. de la Rue

99 **Dynamic distributed parameter model of strip steel** M. Price, H. A. Barker, and K. J. Evans

---

123 ***Historical metallurgy*** **English Steel Corp. Ltd** C. Bodsworth

129 **Quality of green iron ore pellets** H. Sportel, P. Beentjes, J. Rengersen, and J. Droog

133 **Effect of SiO_2 addition on solid state reduction of chromite concentrate** A. Lekatou and R. D. Walker

144 **Influence of high energy ball milling on carbothermic reduction of ilmenite** Y. Chen, T. Hwang, and M. Marsh

150 **Sintering pressure profile analysis by correlation and canonical correlation** M. F. Almeida

155 **Control of microinclusions in calcium treated aluminium killed steels** C. E. Cicutti, J. Madías, and J. C. González

160 **Incorporation of gases in interstitial free steel** A. van Veen, K. T. Westerduin, J. J. F. Scheffer, and A. A. Kamperman

167 **Validation and refining of two-dimensional heat and fluid flow model of single roll casting process and estimation of heat transfer coefficient at caster/drum interface** M. R. R. I. Shamsi and S. P. Mehrotra

174 **Resonance mould system in continuous casting** E. H. Becker, H. von Wyl, D. A. Lohse, and Ch. Bunsen

209 ***Historical metallurgy*** **George James Snelus FRS FRSC (1837–1906)** J. Y. Lancaster

214 ***Historical metallurgy*** **Thomas Firth and John Brown Ltd** C. Bodsworth

221 **Influence of pore saturation on compressive strength of green iron ore pellets** H. Sportel and J. Droog

224 **Kinetics and mechanism of reduction of carbon–chromite composite pellets** Y. L. Ding and N. A. Warner

230 **Partition of sulphur and manganese between blast furnace slag and hot metal** M. Meraikib

239 **Mathematical model for ion refractivity of oxygen in slags** M. Susa and K. Nagata

243 **Representation and interpretation of composition of inclusions** D. P. Wilcox, M. M. Whitwood, and D. J. Dyson

249 **Analysis of surface and internal cracks in continuously cast beam blank** K. Kim, H. N. Han, T. Yeo, Y. Lee, K. H. Oh, and D. N. Lee

257 **Novel continuous casting process for clad steel slabs with level dc magnetic field** E. Takeuchi, M. Zeze, H. Tanaka, H. Harada, and S. Mizoguchi

276 ***Historical metallurgy*** **Samuel Osborn & Co. Ltd** R. Fenn

283 **Reduction of carbon–chromite composite pellets with silica flux** Y. L. Ding and N. A. Warner

288 **Potassium retention by basic mineral (dunite) in blast furnace process** A. Formoso, F. A. López, J. L. G. Fierro, M. T. Larrea, and A. Cores

293 **Coals for cokemaking in stamp charged batteries at Tata Steel** H. N. Prasad, A. Chatterjee, and A. S. Dhillon

300 **Sulphide capacities in $MgO–SiO_2$ and $CaO–MgO–SiO_2$ slags** M. M. Nzotta, R. Nilsson, Du Sichen, and S. Seetharaman

306 **Optical basicity of metallurgical slags: new computer based system for data visualisation and analysis** F. Mitchell, D. Sleeman, J. A. Duffy, M. D. Ingram, and R. W. Young

321 **Unbending of continuously cast slabs with liquid core** M. Deisinger and K.-H. Tacke

329 **Manufacture by electroslag remelting of microalloyed steels with two precipitating metal elements** S. F. Medina, F. López, and A. G. Coedo

337 **Walking characteristic of pair crossed rolling mill** S. Omori, T. Kajiwara, H. Hino, and H. Goto

351 ***Historical metallurgy*** **Steelmaking and Sir William Siemens: Part 1** P. Jenkins

357 ***Historical metallurgy*** **John Summers and Sons Ltd** C. Bodsworth

361 **High strength C–Mn steels for automotive applications** P. J. Evans, L. K. Crawford, and A. Jones

368 **Crystallography of 'raised grains' in interstitial free steels** M. Caul, V. Randle, and L. Burrows

373 **Behaviour of ferruginous burden material in Mannesmann N_2 quenched blast furnace** D. C. Goldring, J. A. Jones, and K. Grebe

386 **Isothermal reduction of chromite fines by carbon saturated chromium melt** B. M. C. Tsomondo, D. J. Simbi, and E. Navara

392 **Experimental study of liquid flow in blast furnace cohesive zone** S. J. Chew, G. X. Wang, A. B. Yu, and P. Zulli

401 **Activity of silica in blast furnace slags** M. Meraikib

406 **Potential role of feldspar/feldspathoid minerals in secondary steelmaking** J. R. MacLean, P. W. Kingston, J. B. MacDonald, and W. F. Caley

412 **Development of continuously annealed soft temper blackplate for drawn and ironed can and deep drawn vessels** J. H. Kwak, J. H. Chung, J. S. Park, and S. K. Ko

434 ***Historical metallurgy*** **Dorman Long and Co. Ltd** C. Bodsworth

441 **Performance of vanadium bearing ferritic stainless steels** R. Paton

447 **Petrology and stability of steel slags** D. C. Goldring and L. M. Juckes

457 **Mechanisms of reduction in iron ore–coal composite pellet** Q. Wang, Z. Yang, J. Tian, W. Li, and J. Sun

461 **Blast furnace burden quality: laboratory simulation** R. Chaigneau, H. Sportel, J. Trouw, R. Vos, and J. Droog

468 **Smelting reduction of prereduced iron ore** S. Prakash, B. K. Dhindaw, and S. Sengupta

476 **Steady state three-dimensional mathematical model for cupola** N. N. Viswanathan, M. N. Srinivasan, and A. K. Lahiri

484 **Coefficient of friction between strand and mould during continuous casting: mathematical model** S. E. Royzman
